

Call: 800.882.9109 For Sizes

**1-3/4" & 2-1/4"
Hard Maple**

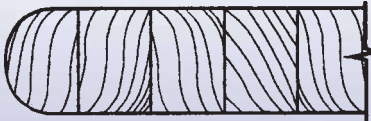

(all sizes available)

Top constructed from select northern hard maple, maximum length laminated strips, and finished with sealer and multiple coats of lacquer. Used in four station workbenches, wall benches, and heavy duty workbenches.

1-3/4" Bullnose Hard Maple *(all sizes available)*

Top constructed from select northern hard maple, maximum length laminated strips, with a rounded bullnose edge. Finished with sealer and multiple coats of lacquer. Used in child care, and office furniture.

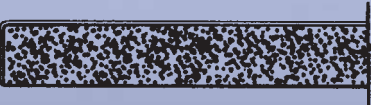

2" Steel Capped *(all sizes available)*

Heavy gauge steel top, folded all four sides, corners welded and ground smooth over a solid core. Used in metalworking benches, heavy duty workbenches, and machine shop benches.

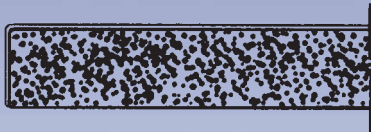

3/4" Fiberesin *(all sizes available)*

Fiberesin is manufactured by a thermal fusing process which cures and permanently bonds melamine impregnated sheets directly to the surfaces of high density industrial grade particle board. Used mainly on drafting and computer tables.

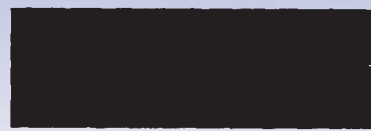

1-1/4" Chemsurf *(all sizes available)*

Chemsurf has a high resistance to chemical attack from organic solvents, alkalis, and acids. A composition of a special resin formulation is applied over phenolic-kraft core to produce a highly specialized pressure laminate bonded to medium density particle board.

1" Epoxy Resin *(all sizes available)*

1" epoxy resin is impervious to normal laboratory chemicals and heat. Its monolithic composition eliminates the possibility of swelling, delamination, and exposure of the substrate. Its soft, low glare surface is simple to clean. Epoxy resin exhibits no effect when subjected to these common laboratory chemicals, Nitric Acid 70%, Acetic Acid (glacial), Hydrochloric Acid 20%, Sulfuric Acid 60%, Methyl Alcohol, Toluene, Benzene, and others. Epoxy resin is solid, homogeneous, molded from modified epoxy resins, completely oven cured during processing. It is durable and impervious to moisture. Exposed edges and corners are finished with a 1/8" bevel. Color: black.

Top Options

CF	Cedarquist fastener for joining tops (factory installed).....	Each
DHV	Drilling for vise attachments	Per Vise

Casework

We provide a wide variety of low and high base cabinets. Base and wall cabinets are constructed of solid maple framing with birch plywood sides using mortise and tenon joint construction. All drawers are constructed using dovetail construction. Masterkeyed cylinder locks are available for all doors and drawers. Finish consists of sealer with multiple coats of lacquer.

Wood Sitting Height Base Cabinets

Bases are all constructed of solid maple framing with birch plywood panel sides utilizing mortise and tenon joint construction. Drawers are constructed using dovetail construction. Finish consists of sealer with multiple coats of lacquer. A wide variety of tops (see page 60), can be used to enhance these units. Locks, finished backs, and extended bases can be furnished at an additional cost--contact Shain for pricing. All units are 23"D x 29-3/4"H. Last two numbers indicate unit width. Units come with toe kicks unless specified. Tops not included.
